DETAILED ACTION

Receipt is acknowledged of amendment and remarks filed on 9/24/09. Claims 4-6 have been cancelled as per applicants' amendment dated 9/24/09.

Status of claims

Claims 4-6 are cancelled. Claims 1-3 are examined in the application.

The following new grounds of rejections are necessitated by the amendment.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-3 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

To overcome the 102 (b) rejection claim 1 has been amended to exclude the cationic polymer since the JP reference cited under 102 (b) teaches cationic polymer.

There is lack of written description for claim 1, wherein the a first agent composition for permanent wave agent and the first agent composition does not contain a cationic polymer having as a monomer dimethyl diallyl ammonium chloride.

Application/Control Number: 10/518,047 Page 3

Art Unit: 1619

Applicants' in the response dated 9/24/09 point out support to pages 15-16 and tables 1-2 and pages 17-18 and tables 3-4. table 1-2 are drawn to inventive compositions and tables 3-4 are drawn to comparative compositions.

Tables 1-2 are drawn to permanent waving compostions and **not to straightener compostions**. Tables1-2 are drawn to compositions using species under anionic surfactant, species under higher alcohol, and species under anionic polymer species under reducing agent. These examples do not have cationic polymer. The comparative examples use two cationic polymers and these are Merquat 550 and Merquat 100. Both these polymers have monomer dimethyl diallyl ammonium chloride. But there are other cationic polymer, which also have the monomer dimethyl diallyl ammonium chloride. These cationic polymers are:

- 1. Polyquaternium 22
- 2. Polyquaternium 39.

Both the cationic polymers have the monomer dimethyl diallyl ammonium chloride. However polyquaternium 22 has another monomer, which is sodium acrylate and Polyquaternium 39 has two different monomers besides the monomer dimethyl diallyl ammonium chloride and these monomers are acrylic amide and sodium acrylate. See U. S. patent 6,486, 105 (col.6, ll 50-59). Polyquaternium 4 has also the monomer dimethyl diallyl ammonium chloride. The other monomer is hydroxyethyl cellulose. See U. S. patent 7,597,880 (col.12, ll 14-15).

Merquat 550 is also known as Polyquaternium 7 and Merquat 100 is also known as Polyquaternium 6. There is lack of written description for all the cationic polymers that have the monomer dimethyl diallyl ammonium chloride.

Art Unit: 1619

Description for species does not support the generic concept. Therefore there is lack of written description for claim 1.

Applicants' did not point out support for straightener compositions that excludes the cationic polymer.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to JYOTHSNA A. VENKAT whose telephone number is 571-272-0607. The examiner can normally be reached on Monday-Friday, 10:30-7:30:1st Friday off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, EYLER YVONNE (BONNIE) can be reached on 571-272-0871. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
